

POSTGRADUATE INSTITUTE OF MEDICINE
UNIVERSITY OF COLOMBO

MD (ORAL & MAXILLOFACIAL SURGERY) EXAMINATION
FEBRUARY 2017

PAPER I

Date: 13th February 2017

Time: 1.30 p.m. – 4.30 p.m.

Answer all four questions.

Each question to be answered in a separate book.

1. Write an account on reconstructive options for post operative facial defects.

2. Discuss the management of condylar fractures of the mandible with emphasis on benefits and complications of different modalities of treatment.

3. Discuss the possible causes and management of restriction of mouth opening.

4. A 65 year old female with a history of ischaemic heart disease and diabetes mellitus, is awaiting a level 2, cervical lymph node biopsy in your unit.
Describe with reasons, the measures that would help to minimize complications of this procedure (highlighting those that might lead to litigation).

MD (ORAL & MAXILLOFACIAL SURGERY) EXAMINATION –
FEBRUARY 2017

PAPER II

Date: 14th February 2017

Time: 9.00 a.m. – 12.00 noon

Answer all four questions.

Each question to be answered in a separate book.

1. Discuss the management of Oral Leukoplakia.

2. What is a fibro-cemento-osseous lesion
Discuss the importance of clinical, radiological and histopathological features in the diagnosis of such lesions.

3. A 50 year old is admitted to undergo surgery for a non-malignant lesion of the maxillary region. He is known to have diabetes and is on insulin and oral medicines for the diabetes.
Briefly describe the complications that could arise during his period of stay in the ward due to diabetes, and its treatment.

4. “Most of the failures in achieving the desired outcome of orthognathic surgeries can be prevented”.
Discuss the above statement.
