MD (ORAL & MAXILLOFACIAL SURGERY) EXAMINATION –
FEBRUARY 2020

PAPER II

Date: 11th February 2020

Time: 9.00 a.m.-12.00 noon

Answer all four (04) questions.

Each question to be answered in a separate book.

1. Write an account on “Diagnosis of non-neoplastic swellings of parotid gland”.
2. Discuss the significance of “Oral Epithelial Dysplasia” in the management of Oral Potentially Malignant Disorders and Oral Cancer.
3. Write an account on the aetiology and management of Anterior Open Bite.
4. A 60-year old man had a maxillo-facial surgery for a malignant lesion on his face. He is a known hypertensive, diabetic and ischaemic heart disease patient being on treatment for the past 15 years. He smokes 10 cigarettes per day from the age of 19.

On the 3rd post-operative day morning, he suddenly complained of difficulty in breathing and was taken to the ICU for further treatment.

4.1 List the possible clinical diagnoses, you would consider in this patient.

4.2. Discuss the management of this patient.
